

PROSTAGLANDINS LEUKOTRIENES AND ESSENTIAL FATTY ACIDS

Prostaglandins Leukotrienes and Essential Fatty Acids (1995) 52, 423-429
© Pearson Professional Ltd 1995

Subject Index to Volume 52

A

Adhesion

- cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303
- endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191

Adipose tissue

- cellular differentiation and dietary regulation of gene expression in preadipose cells, 117
- fatty acids and adipose cell differentiation, 113

Adrenal gland(s)

- lack of a specific effect of corticotropin-releasing hormone on plasma levels of 13,14-dihydro-15-keto-PGE₂, 55
- pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179
- specificity and mechanism of fatty acid inhibition of aldosterone secretion, 145

Adrenocorticotrophic hormone (ACTH)

- lack of a specific effect of corticotropin-releasing hormone on plasma levels of 13,14-dihydro-15-keto-PGE₂, 55
- pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179

Airway(s)

- angiotensin II stimulates peptide leukotriene production by guinea pig airway via the AT₁ receptor pathway, 241
- dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403
- eicosanoids and asthma: an update, 271
- essential fatty acids are antagonists of the leukotriene B₄ receptor, 293
- inhaled nitric oxide reverses platelet-activating factor-dependent bronchoconstriction in the pig, 373
- platelet-activating factor-induced vasopermeability in rat lungs, 245

Alcohol: fatty acid ethyl esters, 87

Aldosterone secretion, specificity and mechanism of fatty acid inhibition of, 145

Algae, occurrence of prostaglandins and related compounds in, 357

Allergic disease

- cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365
- interleukins IL-3 and IL-5 enhance production of leukotriene B₄ stimulated by calcium ionophore in rat basophilic leukaemia cells, 417

Alveolar macrophages, rat, eicosapentaenoic acid modulation of arachidonic acid metabolism in, 259

Anandamide, binding to brain cannabinoid receptors of novel phenolic derivatives of, 83

Angiotensin

- angiotensin II stimulates peptide leukotriene production by guinea pig airway via the AT₁ receptor pathway, 241

specificity and mechanism of fatty acid inhibition of aldosterone secretion, 145

Aortic endothelial cells, cultured bovine, enhancement by oxidized glycated low-density lipoprotein of prostacyclin production in, 263

Arachidonic acid (AA)

- cellular regulation of AA mobilization and metabolism, 93
- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
- effects of fatty acyl coenzyme A esters on lipoxygenase and cyclooxygenase metabolism of AA in rabbit platelets, 255
- eicosapentaenoic acid modulation of AA metabolism in rat alveolar macrophages, 259
- fate of exogenous AA in THP-1 cells: incorporation in cell lipids and conversion to other n-6 fatty acids, 103
- novel AA metabolite in peroxisomes, 77
- prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235
- regulation of AA lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229
- role of AA and/or its metabolites in embryo implantation initiated by epidermal growth factor, 29

Arachidonylethanolamide (anandamide), binding to brain cannabinoid receptors of novel phenolic derivatives of, 83

Asthma and eicosanoids: an update, 271

Atherogenesis/atherosclerosis

- endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191
- enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated low-density lipoprotein, 263
- hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251

B

Bacteria, occurrence of prostaglandins and related compounds in, 357

Biliary tract

- protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35

Blood

- blood cell redox status and fatty acids, 159
- effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59
- phenols inhibit prostaglandin E₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299

Blood pressure: essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 387

- Bone: function of Ca^{2+} influx in phospholipase D activation induced by prostaglandin $\text{F}_{2\alpha}$ in osteoblast-like cells, 319
- Brain cannabinoid receptors, binding of novel phenolic derivatives of anandamide to, 83
- Breast cancer cells in vitro, effects of indomethacin with or without linoleic acid on, 381
- Bronchoconstriction
- angiotensin II stimulates peptide leukotriene production by guinea pig airway via the AT_1 receptor pathway, 241
 - dose-dependent mediation of leukotriene D_4 -induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403
 - eicosanoids and asthma: an update, 271
 - essential fatty acids are antagonists of the leukotriene B_4 receptor, 293
 - inhaled nitric oxide reverses platelet-activating factor-dependent bronchoconstriction in the pig, 373

C

- Cadherin(s): cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303
- Calcium
- cellular regulation of arachidonate mobilization and metabolism, 93
 - function of Ca^{2+} influx in phospholipase D activation induced by prostaglandin $\text{F}_{2\alpha}$ in osteoblast-like cells, 319
 - omega-3 fatty acids and prevention of ventricular fibrillation, 197
 - regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229
- Cannabinoid receptors, brain, binding of novel phenolic derivatives of anandamide to, 83
- Cardiovascular disease *see* Heart; Vascular system
- Cell adhesion *see* Adhesion
- Cell differentiation
- dietary regulation of gene expression and cellular differentiation in preadipose cells, 117
 - differentiation and growth on a fibrin matrix modulate cyclooxygenase expression and thromboxane production by cultured human placental trophoblasts, 21
 - fatty acids and adipose cell differentiation, 113
 - prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235
- Cell growth *see* Growth
- Cell hyperactivity: blood cell redox status and fatty acids, 159
- Cell proliferation
- cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303
 - role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151
 - vitamin E succinate potentiates the inhibitory effect of prostaglandins on oral squamous carcinoma cell proliferation, 69
- Cell replication: effect of essential fatty acid supplementation on keratinocyte replication, 349
- Cell signalling, fatty acids in, 75
see also individual fatty acids
- Cholecystitis: taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35
- Cholestasis: protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- Cholesterol
- altered lipid metabolism in the failing heart of cardiomyopathic hamsters, 199
 - coupling the cholesterol- and tumour-suppressing actions of palm oil to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205
- Coronary heart disease, essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and, 387
- Corticosterone: pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179
- Corticotropin-releasing hormone (CRH): lack of a specific effect of CRH on plasma levels of 13,14-dihydro-15-keto-prostaglandin E_2 , 55

- Curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
- Cyclic AMP: prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235
- Cyclooxygenase (CO; prostaglandin endoperoxide H synthase)
- differentiation and growth on a fibrin matrix modulate CO expression and thromboxane production by cultured human placental trophoblasts, 21
 - effects of fatty acyl coenzyme A esters on lipoxygenase and cyclooxygenase metabolism of arachidonic acid in rabbit platelets, 255
 - effects of indomethacin with or without linoleic acid on human breast cancer cells in vitro, 381
 - lipid mediators and free fatty acids in psoriasis, 1
 - prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235
 - regulation of PGHS/CO isozyme expression, 213
- Cyclosporin
- cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365
 - prostanoids and cyclosporin-mediated nephrotoxicity in rats: a critical appraisal, 49
- Cytokine(s)
- cytoprotective and antisecretory activity of a ranitidine-zinc complex, 393
 - endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191
 - interleukins IL-3 and IL-5 enhance production of leukotriene B_4 stimulated by calcium ionophore in rat basophilic leukaemia cells, 417
- Cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303

D

- Diabetes mellitus
- enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated low-density lipoprotein, 263
 - essential fatty acid metabolism in South Asian patients with essential hypertension coronary heart disease and, 387
 - fatty acyl CoA esters as regulators of cell metabolism, 163
 - hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251
 - pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179
- Diet
- cellular differentiation and dietary regulation of gene expression in preadipose cells, 117
 - cholesterol- and tumour-suppressing actions of palm oil coupled to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205
 - curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
 - differences in the regulation of biosynthesis of 20- versus 22-carbon polyunsaturated fatty acids, 99
 - effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59
- Dihomogammalinolenic acid (DGLA): changes in the fatty acid composition of immune cells and plasma by intravenous injection of DGLA in mice, 289
- 13,14-Dihydro-15-keto-prostaglandin E_2 , lack of a specific effect of corticotropin-releasing hormone on plasma levels of, 55
- Docosahexaenoic acid (DHA)
- endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191
 - omega-3 fatty acids and prevention of ventricular fibrillation, 197

E

- Eicosapentaenoic acid (EPA)
- EPA modulation of arachidonic acid metabolism in rat alveolar macrophages, 259
 - omega-3 fatty acids and prevention of ventricular fibrillation, 197

Embryo implantation initiated by epidermal growth factor, role of arachidonic acid and/or its metabolites in, 29

Endothelium

differential effects of endothelial cell fatty acid modification on the sensitivity of their membrane phospholipids to peroxidation, 341

endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191

enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated low-density lipoprotein, 263

hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251

Endothelium-derived relaxing factor *see* Nitric oxide

Epidermal cells

cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303

effect of essential fatty acid supplementation on keratinocyte replication, 349

Epidermal growth factor (EGF)

role of arachidonic acid and/or its metabolites in embryo implantation initiated by EGF, 29

role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151

Erythrocytes: effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59

Ethanol: fatty acid ethyl esters, 87

F

Fatty acid(s) (FAs; PUFA)

adipose cell differentiation and, 113, 117

aldosterone secretion inhibition by, specificity and mechanism of, 145

altered lipid metabolism in the failing heart of cardiomyopathic hamsters, 199

as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137

blood cell redox status and, 159

cell signalling and, 75

central obesity and free fatty acid metabolism, 209

changes in the fatty acid composition of immune cells and plasma by intravenous injection of dihomogammalinolenic acid in mice, 289

differences in the regulation of biosynthesis of 20- versus 22-carbon polyunsaturated fatty acids, 99

differential effects of endothelial cell fatty acid modification on the sensitivity of their membrane phospholipids to peroxidation, 341

effect of cis-unsaturated fatty acids on heart sarcolemmal phospholipase D activity, 167

effect of essential fatty acid supplementation on keratinocyte replication, 349

effect of glibenclamide on fatty acid metabolism in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325

effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59

endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191

essential fatty acids are antagonists of the leukotriene B_4 receptor, 293

GTP-binding proteins in the PUFA-stimulated proliferation of mouse mammary epithelial cells, 151

hepatic gene expression and, 107

ion channel activity in smooth muscle cells and, 173

lipid binding protein modulation of, 121

lipid mediators and free fatty acids in psoriasis, 1

pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179

protein kinase C activation by free fatty acids, 129

South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, essential fatty acid metabolism in, 387

steroid hormone action and fatty acids, 185

ventricular fibrillation prevention by omega-3 fatty acids, 197

see also individual fatty acids

Fatty acid ethyl esters: non-oxidative metabolites of ethanol, 87

Fatty acyl coenzyme A esters

effects on lipoxygenase and cyclooxygenase metabolism of arachidonic acid in rabbit platelets of, 255

as regulators of cell metabolism, 163

Fungi, occurrence of prostaglandins and related compounds in, 357

G

Gallbladder: taurodeoxycholic acid stimulates eicosanoid release in the rabbit, 35

Gastrointestinal tract

acute mesenteric ischaemia/reperfusion down-regulates renal prostaglandin E_2 synthesis, 41

cytoprotective and antisecretory activity of a ranitidine-zinc complex, 393

possible approach to the suppression of side effects induced by prostaglandin E_1 , 17

prostaglandin E_2 alters terminal glycosylation of high molecular weight glycoproteins released by pig gastric mucous cells in vitro, 333

Gene expression

adipose cell differentiation and fatty acids, 113

cellular differentiation and dietary regulation of gene expression in preadipose cells, 117

effects of fatty acids on hepatic gene expression, 107

fatty acids as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137

regulation of cyclooxygenase/prostaglandin endoperoxide synthase isozyme expression, 213

Glibenclamide, effect on fatty acid metabolism in cultures of newborn rat heart cells under normoxic and hypoxic conditions of, 325

Glucose: hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251

Glutathione-dependent peroxidase: blood cell redox status and fatty acids, 159

Glycoproteins (GPs): prostaglandin E_2 alters terminal glycosylation of high molecular weight GPs released by pig gastric mucous cells in vitro, 333

Growth

cytotoxic effect of Δ^{12} -prostaglandin J_2 on E-cadherin expression in transformed epidermal cells in culture, 303

differentiation and growth on a fibrin matrix modulate cyclooxygenase expression and thromboxane production by cultured human placental trophoblasts, 21

effects of indomethacin with or without linoleic acid on human breast cancer cells in vitro, 381

prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235

Growth factor(s)

role of arachidonic acid and/or its metabolites in embryo implantation initiated by EGF, 29

role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151

GTP-binding proteins, role in the fatty acid-stimulated proliferation of mouse mammary epithelial cells of, 151

H

Heart

altered lipid metabolism in the failing heart of cardiomyopathic hamsters, 199

cholesterol- and tumour-suppressing actions of palm oil coupled to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205

effect of cis-unsaturated fatty acids on sarcolemmal phospholipase D activity, 167

effect of glibenclamide on fatty acid metabolism in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325

- essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 387
- omega-3 fatty acids and prevention of ventricular fibrillation, 197
- Hexadecatrienoic acid: formation of a novel arachidonic acid metabolite in peroxisomes, 77
- Homogammalinolenic acid: essential fatty acids are antagonists of the leukotriene B₄ receptor, 293
- Hormones *see* Steroid hormones
- Hydroxyeicosatetraenoic acid (HETE)
- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
 - cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365
 - eicosanoids and asthma: an update, 271
 - lipid mediators and free fatty acids in psoriasis, 1
 - regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229
- 3-Hydroxy-3-methylglutaryl coenzyme A, coupling the cholesterol- and tumour-suppressing actions of palm oil to the impact of its minor constituents on the activity of, 205
- Hypertension, essential, fatty acid metabolism in South Asian patients with diabetes mellitus coronary heart disease and, 387
- Hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251
- Hypoxia: effect of glibenclamide on fatty acid metabolism in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325

I

- Iloprost: and protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- Immune system: changes in the fatty acid composition of immune cells and plasma by intravenous injection of dihomogammalinolenic acid in mice, 289
- Indomethacin, effects with or without linoleic acid on human breast cancer cells in vitro of, 381
- Inflammation
- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
 - dissimilarity between prostaglandin E₁ and nitric oxide donors as potentiators of plasma exudation in the rabbit skin in vivo, 399
 - dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403
 - eicosapentaenoic acid modulation of arachidonic acid metabolism in rat alveolar macrophages, 259
 - endothelial leukocyte adhesion molecules and omega-3 fatty acids, 191
 - inhaled nitric oxide reverses platelet-activating factor-dependent bronchoconstriction in the pig, 373
 - interleukins IL-3 and IL-5 enhance production of leukotriene B₄ stimulated by calcium ionophore in rat basophilic leukaemia cells, 417
 - platelet-activating factor-induced vasopermeability in rat lungs, 245
 - possible approach to the suppression of side effects induced by prostaglandin E₁, 17
 - taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35
- see also* Bronchoconstriction
- Insulin
- central obesity and free fatty acid metabolism, 209
 - essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 387
- Interleukins IL-3 and IL-5 enhance production of leukotriene B₄ stimulated by calcium ionophore in rat basophilic leukaemia cells, 417
- Ion channels
- direct effects of fatty acids and other charged lipids on ion channel activity in smooth muscle cells, 173
- see also* Calcium
- Iron fortification, effect on the fatty acid composition of plasma and erythrocyte membranes in primary school children of, 59

Ischaemia

- acute mesenteric ischaemia/reperfusion down-regulates renal prostaglandin E₂ synthesis, 41
- effect of glibenclamide on fatty acid metabolism in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325

K

- Keratinocyte replication, effect of essential fatty acid supplementation on, 349
- Kidney
- acute mesenteric ischaemia/reperfusion down-regulates renal prostaglandin E₂ synthesis, 41
 - cyclosporin-mediated nephrotoxicity and prostanoids in rats: a critical appraisal, 49

L

Leukotrienes (LTs)

- angiotensin II stimulates peptide leukotriene production by guinea pig airway via the AT₁ receptor pathway, 241
- cellular regulation of arachidonate mobilization and metabolism, 93
- cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365
- dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403
- effects of indomethacin with or without linoleic acid on human breast cancer cells in vitro, 381
- eicosanoids and asthma: an update, 271
- eicosapentaenoic acid modulation of arachidonic acid metabolism in rat alveolar macrophages, 259
- essential fatty acids are antagonists of the leukotriene B₄ receptor, 293
- interleukins IL-3 and IL-5 enhance production of leukotriene B₄ stimulated by calcium ionophore in rat basophilic leukaemia cells, 417
- lipid mediators and free fatty acids in psoriasis, 1
- phenols inhibit prostaglandin E₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299
- protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229

Linoleic acid (LA)

- effects of indomethacin with or without linoleic acid on human breast cancer cells in vitro, 381
- role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151

Lipid binding proteins, modulation of fatty acids by, 121

Lipid peroxidation

- blood cell redox status and fatty acids, 159
- differential effects of endothelial cell fatty acid modification on the sensitivity of their membrane phospholipids to peroxidation, 341
- essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 385

Lipoprotein, low-density: enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated LDL, 263

Lipoxins: eicosanoids and asthma, 271

Lipoxygenase

- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
- cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365
- effects of fatty acyl coenzyme A esters on lipoxygenase and cyclooxygenase metabolism of arachidonic acid in rabbit platelets, 255
- lipid mediators and free fatty acids in psoriasis, 1
- regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229

Liver

- cellular differentiation and dietary regulation of gene expression in preadipose cells, 117
 - central obesity and free fatty acid metabolism, 209
 - effects of fatty acids on hepatic gene expression, 107
 - fatty acid ethyl esters and, 87
 - fatty acyl CoA esters as regulators of cell metabolism, 163
 - protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- Lower organisms, occurrence of prostaglandins and related compounds in, 357

Lung(s)

- eicosapentaenoic acid modulation of arachidonic acid metabolism in rat alveolar macrophages, 259
- platelet-activating factor-induced vasopermeability in rat lungs, 245

M

- Macrophages, alveolar, rat, eicosapentaenoic acid modulation of arachidonic acid metabolism in, 259

Membrane(s)

- differential effects of endothelial cell fatty acid modification on the sensitivity of their membrane phospholipids to peroxidation, 341
- effect of cis-unsaturated fatty acids on heart sarcolemmal phospholipase D activity, 167
- effect of glibenclamide on the metabolism of membrane fatty acids in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325
- effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59
- essential fatty acids are antagonists of the leukotriene B₄ receptor, 293

Microvascular permeability

- dissimilarity between prostaglandin E₁ and nitric oxide donors as potentiators of plasma exudation in the rabbit skin in vivo, 399
- dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403

- platelet-activating factor-induced vasopermeability in rat lungs, 245

Muscle

- direct effects of fatty acids and other charged lipids on ion channel activity in smooth muscle cells, 173
- effect of glibenclamide on the metabolism of fatty acids in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325
- inhaled nitric oxide reverses platelet-activating factor-dependent bronchoconstriction in the pig, 373

Myocardium

- effect of cis-unsaturated fatty acids on sarcolemmal phospholipase D activity, 167
- effect of glibenclamide on the metabolism of fatty acids in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325

N

Neutrophils

- blood cell redox status and fatty acids, 159
 - cellular regulation of arachidonate mobilization and metabolism, 93
 - essential fatty acids are antagonists of the leukotriene B₄ receptor, 293
 - phenols inhibit prostaglandin E₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299
- Nipicotamides, inhibition of platelet-activating factor-induced human platelet aggregation by, 309

Nitric oxide (NO)

- dissimilarity between prostaglandin E₁ and NO donors as potentiators of plasma exudation in the rabbit skin in vivo, 399
- inhaled NO reverses platelet-activating factor-dependent bronchoconstriction in the pig, 373

O

Obesity

- central obesity and free fatty acid metabolism, 209
- essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 387
- pituitary-adrenocortical activity regulation by free fatty acids in vivo and in vitro, 179

Oedema

- dissimilarity between prostaglandin E₁ and nitric oxide donors as potentiators of plasma exudation in the rabbit skin in vivo, 399
- dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403

- platelet-activating factor-induced vasopermeability in rat lungs, 245

Oestrogen(s)

- fatty acids and steroid hormone action, 185
- role of arachidonic acid and/or its metabolites in embryo implantation initiated by epidermal growth factor, 29

Oleic acid

- free fatty acid activation of protein kinase C, 129
- specificity and mechanism of fatty acid inhibition of aldosterone secretion, 145

- Oral cancer: vitamin E succinate potentiates the inhibitory effect of prostaglandins on squamous carcinoma cell proliferation, 69

- Organ differentiation: prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235

- Osteoblast-like cells, function of Ca²⁺ influx in phospholipase D activation induced by prostaglandin F_{2α} in, 319

P

- Palm oil: coupling the cholesterol- and tumour-suppressing actions to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205

- Pentoxifylline: acute mesenteric ischaemia/reperfusion down-regulates renal prostaglandin E₂ synthesis, 41

- Peptic ulceration: cytoprotective and antisecretory activity of a ranitidine-zinc complex, 393

Peroxisomal proliferators (PP)

- adipose cell differentiation and fatty acids, 113
- effects of fatty acids on hepatic gene expression, 107

- Peroxisomes, formation of a novel arachidonic acid metabolite in, 77

- Phenols inhibit prostaglandin E₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299

Phospholipase(s)

- cellular regulation of arachidonate mobilization and metabolism, 93

- cyclosporin A inhibits leukotriene production in intact RBL-1 cells without inhibiting LT biosynthetic enzymes, 365

- effect of cis-unsaturated fatty acids on heart sarcolemmal phospholipase D activity, 167

- function of Ca²⁺ influx in phospholipase D activation induced by prostaglandin F_{2α} in osteoblast-like cells, 319

- interleukins IL-3 and IL-5 enhance the production of leukotriene B₄ stimulated by calcium ionophore in rat basophilic leukaemia cells, 417

- prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235

Pituitary gland

- lack of a specific effect of corticotropin-releasing hormone on plasma levels of 13,14-dihydro-15-keto-PGE₂, 55

- regulation of pituitary-adrenocortical activity by free fatty acids in vivo and in vitro, 179

- Placenta: differentiation and growth on a fibrin matrix modulate cyclooxygenase expression and thromboxane production by cultured human placental trophoblasts, 21

Platelet(s)

- blood cell redox status and fatty acids, 159
- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223

- effects of fatty acyl coenzyme A esters on lipoxygenase and

- cyclooxygenase metabolism of arachidonic acid in rabbit platelets, 255
- free fatty acid activation of protein kinase C, 129
- inhibition of PAF-induced human platelet aggregation by anti-thrombotic nipecotamides, 309
- Platelet-activating factor (PAF)
- inhaled nitric oxide reverses PAF-dependent bronchoconstriction in the pig, 373
- inhibition of PAF-induced human platelet aggregation by anti-thrombotic nipecotamides, 309
- PAF-induced vasopermeability in rat lungs, 245
- Polyunsaturated fatty acids *see* Fatty acid(s)
- Potassium
- direct effects of fatty acids and other charged lipids on ion channel activity in smooth muscle cells, 173
- effect of glibenclamide on the metabolism of fatty acids in cultures of newborn rat heart cells under normoxic and hypoxic conditions, 325
- Pre-eclampsia: differentiation and growth on a fibrin matrix modulate cyclooxygenase expression and thromboxane production by cultured human placental trophoblasts, 21
- Pregnancy
- differentiation and growth on a fibrin matrix modulate cyclooxygenase expression and thromboxane production by cultured human placental trophoblasts, 21
- regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229
- role of arachidonic acid and/or its metabolites in embryo implantation initiated by epidermal growth factor, 29
- Prostacyclin (Prostaglandin I₂)
- eicosanoids and asthma: an update, 271
- enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated low-density lipoprotein, 263
- hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251
- taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35
- Prostaglandin D₂: eicosanoids and asthma, 271
- Prostaglandin E₁ (PGE₁)
- dissimilarity between PGE₁ and nitric oxide donors as potentiators of plasma exudation in the rabbit skin *in vivo*, 399
- possible approach to the suppression of side effects induced by, 17
- Prostaglandin E₂ (PGE₂)
- acute mesenteric ischaemia/reperfusion down-regulates renal PGE₂ synthesis, 41
- effects of indomethacin with or without linoleic acid on human breast cancer cells *in vitro*, 381
- eicosanoids and asthma: an update, 271
- lack of a specific effect of corticotropin-releasing hormone on plasma levels of 13,14-dihydro-15-keto-PGE₂, 55
- phenols inhibit PGE₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299
- prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235
- protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413
- taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35
- terminal glycosylation of high molecular weight glycoproteins released by pig gastric mucous cells *in vitro* and, 333
- vitamin E succinate potentiates the inhibitory effect of prostaglandins on oral squamous carcinoma cell proliferation, 69
- Prostaglandin endoperoxide H synthase *see* Cyclooxygenase
- Prostaglandin F_{2α} (PGF_{2α}): function of Ca²⁺ influx in phospholipase D activation induced by PGF_{2α} in osteoblast-like cells, 319
- Prostaglandin I₂ *see* Prostacyclin
- Prostaglandin J₂
- cytotoxic effect of Δ¹²-prostaglandin J₂ on E-cadherin expression in transformed epidermal cells in culture, 303
- vitamin E succinate potentiates the inhibitory effect of prostaglandins on oral squamous carcinoma cell proliferation, 69
- Protein kinase(s)
- cellular regulation of arachidonate mobilization and metabolism, 93
- free fatty acid activation of protein kinase C, 129
- function of Ca²⁺ influx in phospholipase D activation induced by prostaglandin F_{2α} in osteoblast-like cells: involvement of tyrosine kinase, 319
- Protozoa, occurrence of prostaglandins and related compounds in, 357
- Psoriasis, lipid mediators and free fatty acids in, 1

R

- Ranitidine-zinc complex, cytoprotective and antisecretory activity of, 393
- Ras proteins: role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151
- Receptor(s)
- angiotensin
- angiotensin II stimulates peptide leukotriene production by guinea pig airway via the AT₁ receptor pathway, 241
- specificity and mechanism of fatty acid inhibition of aldosterone secretion, 145
- brain cannabinoid, binding of novel phenolic derivatives of anandamide to, 83
- epidermal growth factor: role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151
- leukotriene B₄, essential fatty acids as antagonists of, 293
- peroxisomal proliferator-activated receptors adipose cell differentiation and fatty acids, 113
- effects of fatty acids on hepatic gene expression, 107
- platelet-activating factor: inhibition of PAF-induced human platelet aggregation by antithrombotic nipecotamides, 309
- steroid hormone: fatty acids as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137
- Renal prostaglandins *see* Kidney
- Respiratory system
- dose-dependent mediation of leukotriene D₄-induced airway microvascular leakage and bronchoconstriction in the guinea pig, 403
- eicosanoids and asthma: an update, 271
- eicosapentaenoic acid modulation of arachidonic acid metabolism in rat alveolar macrophages, 259
- essential fatty acids are antagonists of the leukotriene B₄ receptor, 293
- inhaled nitric oxide reverses PAF-dependent bronchoconstriction in the pig, 373
- platelet-activating factor-induced vasopermeability in rat lungs, 245
- see also* Airway
- Ricinoleic acid: essential fatty acids are antagonists of the leukotriene B₄ receptor, 293

S

- Sarcolemma, effect of cis-unsaturated fatty acids on phospholipase D activity in, 167
- Second International Round Table on Fatty Acids in Cell Signalling (12–13 June 1994), 75
- Signal transduction
- cellular regulation of arachidonate mobilization and metabolism, 93
- fatty acids and adipose cell differentiation, 113
- fatty acids as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137
- fatty acids and steroid hormone action, 185
- free fatty acid activation of protein kinase C, 129
- lipid binding protein modulation of fatty acids, 121
- role of GTP-binding proteins in the fatty acid-stimulated proliferation of mouse mammary epithelial cells, 151
- Skin
- dissimilarity between prostaglandin E₁ and nitric oxide donors as potentiators of plasma exudation in the rabbit skin *in vivo*, 399
- fibroblasts: formation of a novel arachidonic acid metabolite in peroxisomes, 77
- lipid mediators and free fatty acids in psoriasis, 1
- Spices: curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223

Squamous cell carcinoma, oral: vitamin E succinate potentiates the inhibitory effect of prostaglandins on cell proliferation, 69

Steroid hormones

- fatty acids as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137
- fatty acids and steroid hormone action, 185
- lack of a specific effect of corticotropin-releasing hormone on plasma levels of 13,14-dihydro-15-keto-PGE₂, 55
- regulation of pituitary-adrenocortical activity by free fatty acids in vivo and in vitro, 179
- role of arachidonic acid and/or its metabolites in embryo implantation initiated by epidermal growth factor, 29
- specificity and mechanism of fatty acid inhibition of aldosterone secretion, 145

Stomach

- peptic ulceration: cytoprotective and antiseecretory activity of a ranitidine-zinc complex, 393
- prostaglandin E₂ alters terminal glycosylation of high molecular weight glycoproteins released by pig gastric mucous cells in vitro, 333

T

Tail: prostaglandin metabolism during growth and differentiation of the regenerating vertebral appendage, 235

Taurodeoxycholic acid stimulates rabbit gallbladder eicosanoid release, 35

Thromboxane

- curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223
- differentiation and growth on a fibrin matrix modulate cyclo-oxygenase expression and thromboxane production by cultured human placental trophoblasts, 21
- eicosanoids and asthma: an update, 271
- phenols inhibit prostaglandin E₂ synthesis in A23187-stimulated human whole blood and modify the ratio of arachidonic acid metabolites, 299
- protective effect of thromboxane synthetase inhibitor UK 38485 against bile duct ligation-induced liver injury, 413

Transcription

- adipose cell differentiation and fatty acids, 113
- cellular differentiation and dietary regulation of gene expression in preadipose cells, 117
- effects of fatty acids on hepatic gene expression, 107
- fatty acids as ancestral ligands and modern co-regulators of the steroid hormone receptor cell signalling pathway, 137

Trophoblasts, cultured human placental, differentiation and growth on a fibrin matrix modulate cyclo-oxygenase expression and thromboxane production by, 21

Tumour(s)

- cholesterol- and tumour-suppressing actions of palm oil coupled to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205
- cytotoxic effect of Δ^{12} -prostaglandin J₂ on E-cadherin expression in transformed epidermal cells in culture, 303
- effects of indomethacin with or without linoleic acid on human breast cancer cells in vitro, 381

vitamin E succinate potentiates the inhibitory effect of prostaglandins on oral squamous carcinoma cell proliferation, 69

Turmeric: curcumin inhibits aggregation and alters eicosanoid metabolism in human blood platelets, 223

Tyrosine kinase: and function of Ca²⁺ influx in phospholipase D activation induced by prostaglandin F_{2α} in osteoblast-like cells, 319

U

Ulceration, peptic: cytoprotective and antiseecretory activity of a ranitidine-zinc complex, 393

Umbilical vein endothelial cells

- differential effects of endothelial cell fatty acid modification on the sensitivity of their membrane phospholipids to peroxidation, 341

hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251

Uterus

- regulation of arachidonate lipoxygenase metabolite formation in cells derived from intrauterine tissues, 229
- role of arachidonic acid and/or its metabolites in embryo implantation initiated by epidermal growth factor, 29

V

Vascular system

acute mesenteric ischaemia/reperfusion down-regulates renal prostaglandin E₂ synthesis, 41

cholesterol- and tumour-suppressing actions of palm oil coupled to the impact of its minor constituents on 3-hydroxy-3-methylglutaryl coenzyme A reductase activity, 205

effect of iron fortification on the fatty acid composition of plasma and erythrocyte membranes in primary school children, 59

enhancement of prostacyclin production in cultured bovine aortic endothelial cells by oxidized glycated low-density lipoprotein, 263

essential fatty acid metabolism in South Asian patients with essential hypertension diabetes mellitus and coronary heart disease, 387

hypoglycaemia stimulates thrombin-induced prostacyclin production by cultured human umbilical vein cells, 251

omega-3 fatty acids and endothelial leukocyte adhesion molecules, 191

omega-3 fatty acids and prevention of ventricular fibrillation, 197
see also Blood; Heart; Microvascular permeability

Ventricular fibrillation, omega-3 fatty acids and prevention of, 197

Vitamin E succinate potentiates the inhibitory effect of prostaglandins on oral squamous carcinoma cell proliferation, 69

Y

Yeasts, occurrence of prostaglandins and related compounds in, 357

Z

Zellweger's syndrome: formation of a novel arachidonic acid metabolite in peroxisomes, 77

Zinc-ranitidine complex, cytoprotective and antiseecretory activity of, 393

PROSTAGLANDINS LEUKOTRIENES AND ESSENTIAL FATTY ACIDS

Prostaglandins Leukotrienes and Essential Fatty Acids (1995) 52, 431-433
